

My name is Archie Morgan and I am the President of Monroe Broadcasting Co. in Monroe, NC. WIXE is the only station that I have and this is my hometown. I know the people and they know me. They know me as a responsible broadcaster who has been outspoken for some time in the community and on the air about the sexual content of some broadcast organizations. If I were to broadcast such filth the FCC would have to come after the crumbs as my listeners would hang me first! I think that this is true for the majority of broadcasters through-out the nation. I would urge you to take that into consideration before making a decision that would punish all for the transgressions of a few. The cost of recording 6A-10P would be substantial with the purchase of equipment, the burden of assigning a person to implement and keep up with the equipment and its operation.

I feel the industry as a whole is being punished because of a few 'Bad Apples'. Why not have stations that have a track record of complaints be responsible for recording their shows to prove that they no longer broadcast indecent material? We are a small market station and do not have the manpower to do this. Additional staff would have to be hired.

I must say also that even though I would never consider broadcasting questionable material, I question whether the First Amendment comes into play here.

I urge the FCC to consider all sides when it comes to a rule-making decision on this.

Sincerely,  
Archie Morgan  
President  
WIXE  
Monroe, NC
